

# Decisions for the Decades: A serious game on long- term decision making

# Quantitative information is indispensable for managing many of society's most pressing policy challenges

Climate change

Governing technology

Inequality and inequity

Threats to democracy

Managing risk

*But the available information is often uncertain, incomplete, and contested*

# “Serious games” can help improve risk management

Powerful methods now exist to help manage risk under conditions of deep uncertainty

Data and argument alone are insufficient for effective risk communication

Serious games provide a compelling means to help disseminate new methods for risk management

# Decisions for the Decades

How do we make smart long-term decisions?

All Participate  
(...expect confusion...)

**THE WORLD BANK**

**RED CROSS/RED CRESCENT

The Netherlands  **Red Cross**

*Special thanks to Pablo Suarez and Janot Mendler de Suarez (Red Cross / Red Crescent Climate Centre)*

# Your role.....

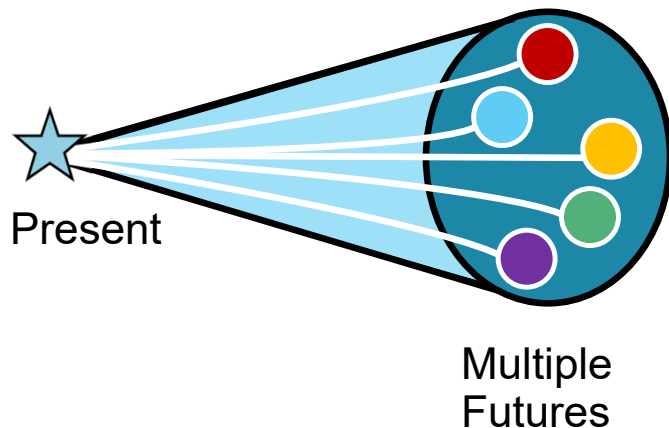

The principal planner  
of a city  
within a larger region

# Your objective..... prepare your community for the future

## The Cone of Uncertainty

- What will the future bring?
- Will it be different from the past? In what way?
- What investment decisions should we make?
- Will we be prepared?

# The Set-up

# Making Decisions

*City* decisions are independent

- Use individual *City* boards and black beans

*Regional* decisions require teamwork

- Use single *Region* board and white beans

# CITY BOARD

If you roll a flood: lose 1 bean

Earn 1 Prosperity Point per bean, **but only if no crisis**

If you roll a drought: lose 1 bean

## How to win

### Winning City

- **Fewest crises**
- Only 1 city winner per region
- Tiebreaker within region: city with most prosperity

Decade	2. INVESTMENT DECISIONS				3. OBSERVATIONS	4. RESULTS	
	FLOOD Protection (0–9)	INVESTMENT & DEVELOPMENT (1–10)	DROUGHT Protection (0–9)	Choose Insurance?	Annual Precipitation	# Crises	# Prosperity Points
1				<del>Choose Insurance?</del>			
2				Yes / No			
3				Yes / No			
4				Yes / No			
<b>TOTAL:</b>							

# REGION BOARD

If you roll a flood: lose 1 bean

Earn 1 Prosperity Point per bean, **but only if no crisis**

If you roll a drought: lose 1 bean

## How to win

### Winning Region

- Most Prosperity
- Tiebreaker: Region with fewest crises

Decade	2. INVESTMENT DECISIONS				3. OBSERVATIONS	4. RESULTS	
	FLOOD Protection (0-9)	INVESTMENT & DEVELOPMENT (1-10)	DROUGHT Protection (0-9)	Choose Insurance?	Annual Precipitation	# Crises	# Prosperity Points
1				<del>Choose Insurance?</del>			
2				Yes / No			
3				Yes / No			
4				Yes / No			
<b>TOTAL:</b>							

# Steps of the Game

- 1 Receive scientific information
- 2 Make decisions
- 3 Record weather observations
- 4 Tally results

# Steps of the Game

1 Receive scientific information

2 Make decisions

3 Record weather observations

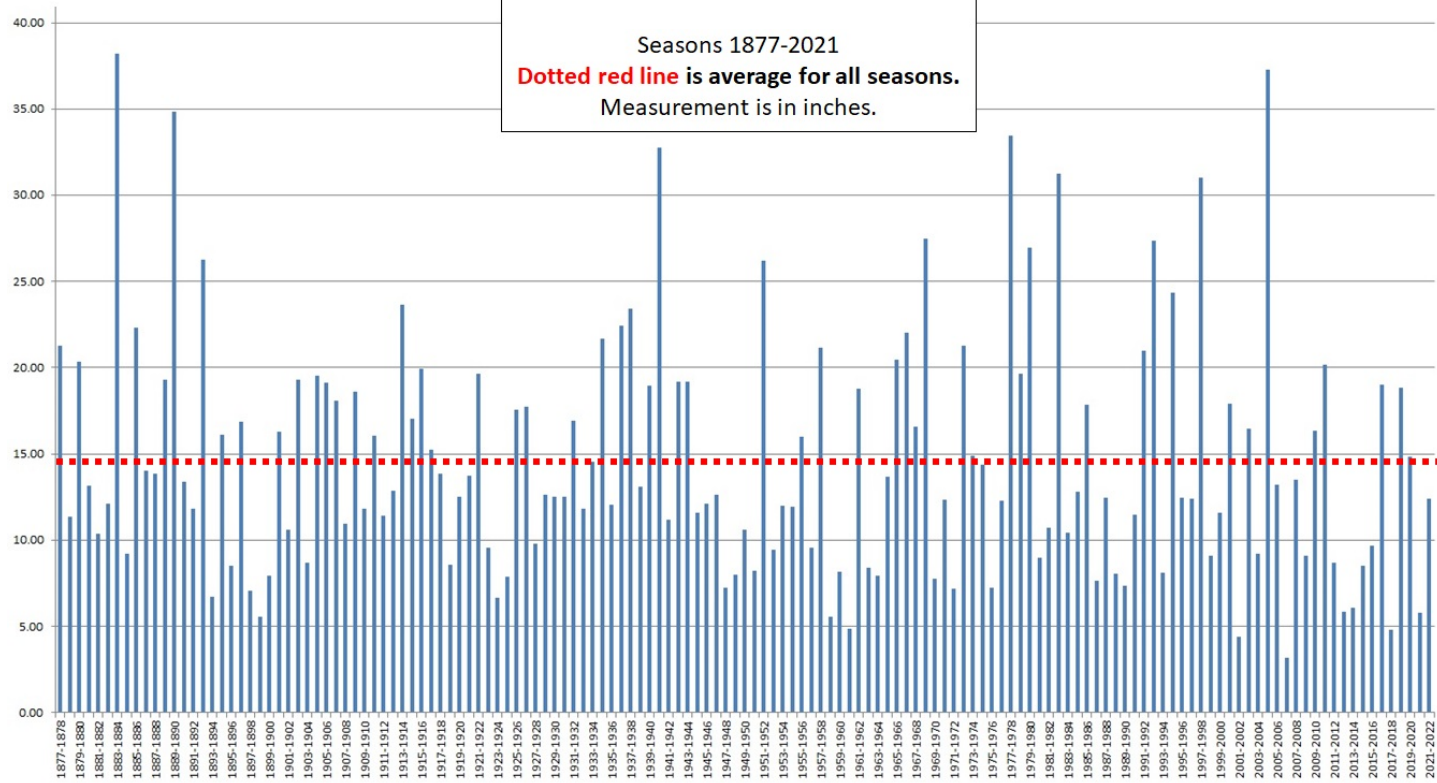

4 Tally results

# 1

# Scientific Information

### Annual Rainfall Chart

Seasons 1877-2021  
Dotted red line is average for all seasons.  
Measurement is in inches.

# 1 Scientific Information

Your source of information

= Flood

= Drought

## 2 Make decisions

Allocate resources for each decade (10 beans total)

Decade	2. INVESTMENT DECISIONS			3. OBSERVATIONS	4. RESULTS		
	FLOOD Protection (0-9)	INVESTMENT & DEVELOPMENT (1-10)	DROUGHT Protection (0-9)		Choose Insurance?	Annual Precipitation	# Crises
1				<del>Choose Insurance?</del>			
2				Yes / No			
3				Yes / No			
4				Yes / No			
<i>TOTAL:</i>							

## 2 Make decisions

2. INVESTMENT DECISIONS				3. OBSERVATIONS		4. RESULTS	
Decade	FLOOD Protection (0-9)	INVESTMENT & DEVELOPMENT (1-10)	DROUGHT Protection (0-9)	Choose Insurance?	Annual Precipitation	# Crises	# Prosperity Points
1	0	9	1	<del>Choose Insurance?</del>			
2				Yes / No			
3				Yes / No			
4				Yes / No			
<i>TOTAL:</i>							

## 2 Make decisions

Decade	2. INVESTMENT DECISIONS			3. OBSERVATIONS	4. RESULTS		
	FLOOD Protection (0-9)	INVESTMENT & DEVELOPMENT (1-10)	DROUGHT Protection (0-9)		Choose Insurance?	Annual Precipitation	# Crises
1	1	8	1	<del>Choose Insurance?</del>			
2				Yes / No			
3				Yes / No			
4				Yes / No			
<i>TOTAL:</i>							

### 3 Record observations

**10 rolls = 10 years of precipitation**

### 3 Record observations

10 rolls = 10 years of precipitation

Decade	2. INVESTMENT DECISIONS				3. OBSERVATIONS	4. RESULTS	
	FLOOD Protection (0-9)	INVESTMENT & DEVELOPMENT (1-10)	DROUGHT Protection (0-9)	Choose Insurance?		# Crises	# Prosperity Points
1	0	9	1	Choose Insurance?	1, 4, 3, 3, 2, 5, 2, 3, 5, 4		
2				Yes / No	One Drought		
3				Yes / No			
4				Yes / No			
TOTAL:							

# 4 Tally results

Since one drought occurs, we “consume” one protection bean

We protected against 1 drought

Decade	2. INVESTMENT DECISIONS			3. OBSERVATIONS	4. RESULTS		
	FLOOD Protection (0–9)	INVESTMENT & DEVELOPMENT (1–10)	DROUGHT Protection (0–9)		Choose Insurance?	Annual Precipitation	# Crises
1	0	9	1	<del>Choose Insurance?</del>			
2				Yes / No			
3				Yes / No			
4				Yes / No			
<i>TOTAL:</i>							

# 4 Tally results

**We get 9 Prosperity Points for the remaining beans!**

Decade	2. INVESTMENT DECISIONS			3. OBSERVATIONS	4. RESULTS	
	FLOOD Protection (0-9)	INVESTMENT & DEVELOPMENT (1-10)	DROUGHT Protection (0-9)		# Crises	# Prosperity Points
1	0	9	1	<del>Choose Insurance?</del>	Annual Precipitation	
2				Yes / No		
3				Yes / No		
4				Yes / No		
<i>TOTAL:</i>						

# 4 Tally results

But what if we had a second drought?

Decade	2. INVESTMENT DECISIONS			3. OBSERVATIONS	4. RESULTS		
	FLOOD Protection (0-9)	INVESTMENT & DEVELOPMENT (1-10)	DROUGHT Protection (0-9)		Choose Insurance?	Annual Precipitation	# Crises
1							
2				Yes / No			
3				Yes / No			
4				Yes / No			
TOTAL:							

# 4 Tally results

Each shortage of protection is a new crisis!

Not enough protection means...  
 ...a social and environmental crisis  
 ...and 0 Prosperity Points!

Decade	2. INVESTMENT DECISIONS			3. OBSERVATIONS	4. RESULTS		
	FLOOD Protection (0-9)	INVESTMENT & DEVELOPMENT (1-10)	DROUGHT Protection (0-9)		Choose Insurance?	Annual Precipitation	# Crises
1				<del>Choose Insurance?</del>			
2				Yes / No			
3				Yes / No			
4				Yes / No			
TOTAL:							

# 4 Tally results

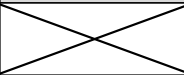

*If one drought occurs:*

City 1       x9       x1      0       x9

---

City 2       x2       x8       x1      0

Decade	2. INVESTMENT DECISIONS				3. OBSERVATIONS	4. RESULTS	
	FLOOD Protection (0-9)	INVESTMENT & DEVELOPMENT (1-10)	DROUGHT Protection (0-9)	Choose Insurance?		Annual Precipitation	# Crises
1							
2				Yes / No			
3				Yes / No			
4				Yes / No			
<i>TOTAL:</i>							

## Repeat steps 1 through 4

- 1 Receive scientific information
- 2 Make decisions
- 3 Record weather observations
- 4 Tally results

# Key Rules

## **Simplification of reality**

*No challenging the rules!*

## **Decisions are individual**

*No consulting on City Decisions*

*Do collaborate on Regional Decisions*

## **We will play 4 decades of decision making**

*Each round is 10 years*

# Winning the game

## Winning City:

- *Cities with fewest crises for each Region*
  - *Only 1 City winner per Region*
  - *Tiebreaker within Region: City with the most Prosperity Points*
- 

## 1 Winning Region:

- *Most Prosperity Points*
- *Tiebreaker: Region with fewest crises*

***There are prizes!!!***

The background of the slide is a complex 3D maze rendered in a light blue color. The maze consists of numerous interconnected paths and dead ends, creating a sense of depth and complexity. A horizontal band of a vibrant green color runs across the center of the image, partially obscuring the maze. The text "Let's Play!!!" is centered within this green band.

*Let's Play!!!*

**Round 1**  
**(years 1-10)**

1

Scientific Information

## Historical precipitation

= Flood

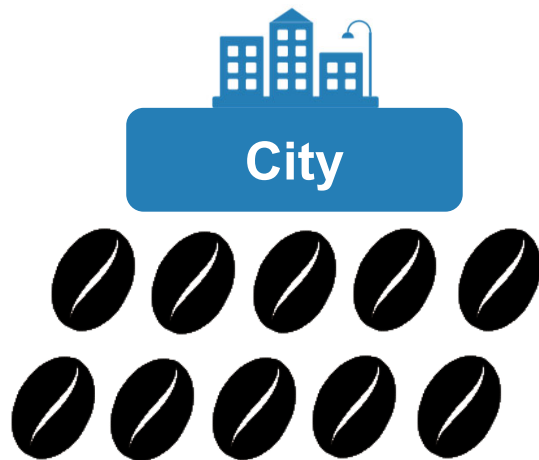

= Drought

## 2 Make decisions

### **Make investments for the coming decade**

Allocate the beans and record your investments

### 3 Record observations

**Ten years of precipitation occur**

\*Use one die for the entire table—applies to City and Region

# 4

## Tally results Record results

Decade	2. INVESTMENT DECISIONS				3. OBSERVATIONS	4. RESULTS	
	FLOOD Protection (0-9)	INVESTMENT & DEVELOPMENT (1-10)	DROUGHT Protection (0-9)	Choose Insurance?	Annual Precipitation	# Crises	# Prosperity Points
1							
2				Yes / No			
3				Yes / No			
4				Yes / No			
<i>TOTAL:</i>							

**Round 2**  
**(years 11-20)**

1

Scientific Information

## Historical precipitation

= Flood

= Drought

## 2 Make decisions

### New investment option: Insurance

#### Insurance

- Insurance insulates you from crises
- You are guaranteed a fixed number of prosperity beans, no matter how many floods or droughts occur
- How many beans would you pay for this insurance?

....Insurance costs 7 beans, and will result in a guaranteed 3 prosperity points and no crises

## 2 Make decisions

# Make investments for the coming decade

Allocate the beans or choose insurance

Record your investments

3 Record observations

***TWO* years of precipitation occur**

**x2 only**

Have you heard about...  
**CLIMATE CHANGE?**

### 3 Record observations

## Eight more years of precipitation

**× 8**

# 4

## Tally results

### Record results

Decade	2. INVESTMENT DECISIONS				3. OBSERVATIONS	4. RESULTS	
	FLOOD Protection (0-9)	INVESTMENT & DEVELOPMENT (1-10)	DROUGHT Protection (0-9)	Choose Insurance?	Annual Precipitation	# Crises	# Prosperity Points
1				X			
2				Yes / No	☂️ 🌵	⚠️	💰
3				Yes / No			
4				Yes / No			
<i>TOTAL:</i>							

**Round 3**  
**(years 21-30)**

1

Scientific Information

## Precipitation under climate change

## 2 Make decisions

### Buy insurance?

#### Insurance

- How many beans will you spend for this insurance?

The cost of insurance has increased! It now costs eight beans and will result in a guaranteed two prosperity points and zero crises.

## 2 Make decisions

# Make investments for the coming decade

Allocate the beans or choose insurance

Record your investments

3 Record observations

**Ten years of precipitation occur**

~~x2~~ x10

# 4

## Tally results

## Record results

Decade	2. INVESTMENT DECISIONS				3. OBSERVATIONS	4. RESULTS	
	FLOOD Protection (0-9)	INVESTMENT & DEVELOPMENT (1-10)	DROUGHT Protection (0-9)	Choose Insurance?	Annual Precipitation	# Crises	# Prosperity Points
1				X			
2				Yes / No			
3				Yes / No	 		
4				Yes / No			
<i>TOTAL:</i>							

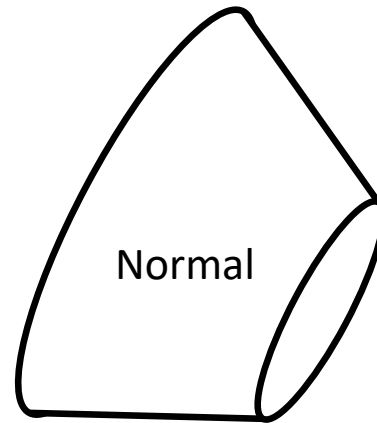

**Round 4**  
**(years 31-40)**

1

# Scientific Information

## **A NEW MODEL for climate change**

2

Make decisions

**Buy insurance?**

Insurance

Insurance is available. Cost is eight beans, and results in guaranteed two prosperity points and no crises.

## 2 Make decisions

# Make investments for the coming decade

Allocate the beans or choose insurance

Record your investments

### 3 Record observations

## Ten years of precipitation

*Climate will remain deeply uncertain...*

# 4

## Tally results

### Decades 1–3 ONLY

Decade	2. INVESTMENT DECISIONS				3. OBSERVATIONS	4. RESULTS	
	FLOOD Protection (0–9)	INVESTMENT & DEVELOPMENT (1–10)	DROUGHT Protection (0–9)	Choose Insurance?	Annual Precipitation	# Crises	# Prosperity Points
1				<del>Choose Insurance?</del>			
2				Yes / No			
3				Yes / No			
4				Yes / No			
<i>TOTAL:</i>							

**Fewest Crises = City winner!**

**Most Prosperity Points = Region winner!**

# One last task..

In your groups, identify:

- One thing you learned from the game, and
- One thing you felt

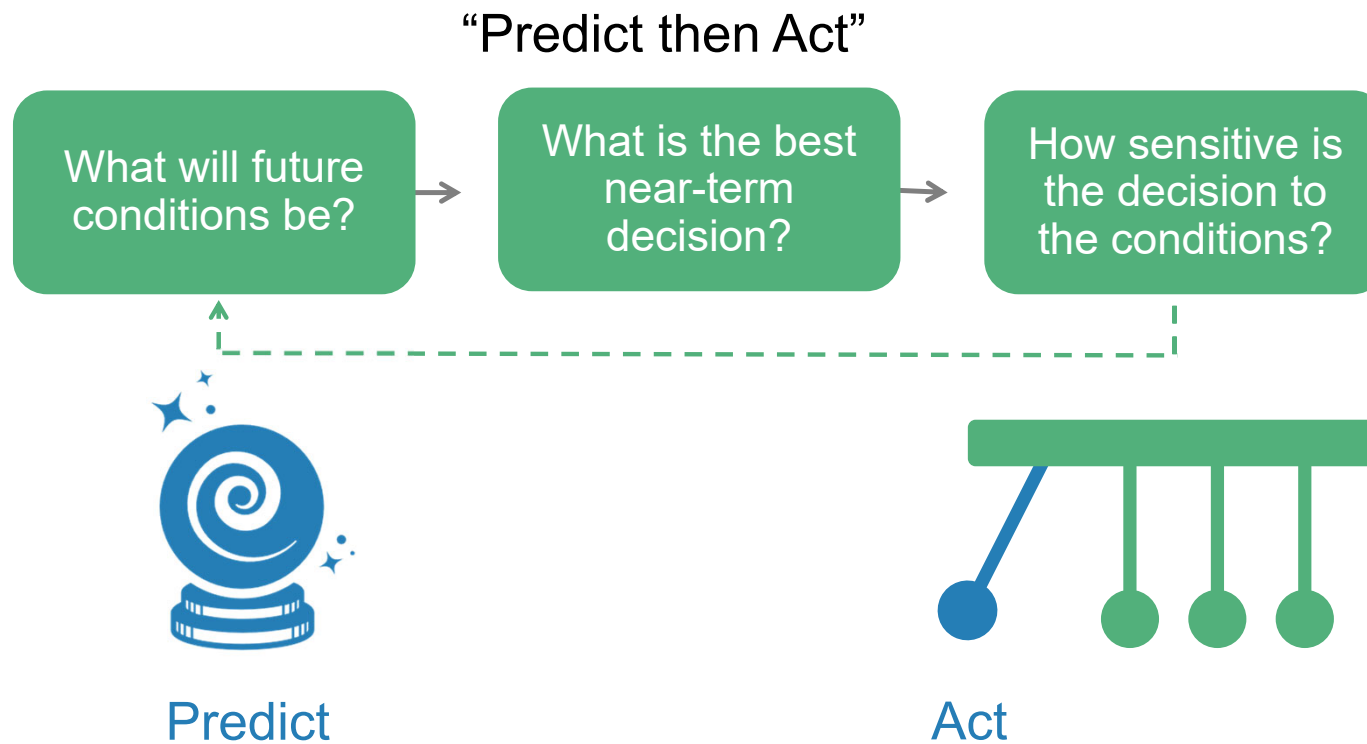

***Thanks for playing  
Decisions for the Decades!***

We can act to shape the future,  
even when we can't predict what that future will be

# Policy analysis traditionally begins with a consensus understanding of the future

“Predict then Act” can break down when uncertainties are deep

Predict

Act

# “Predict then Act” can break down when uncertainties are deep

Uncertainties  
are underestimated

Competing analyses can  
contribute to gridlock

Predict-then-act distracts from the  
main task of working together to  
identify creative solutions

# “Predict then Act” can break down when uncertainties are deep

Uncertainties  
are underestimated

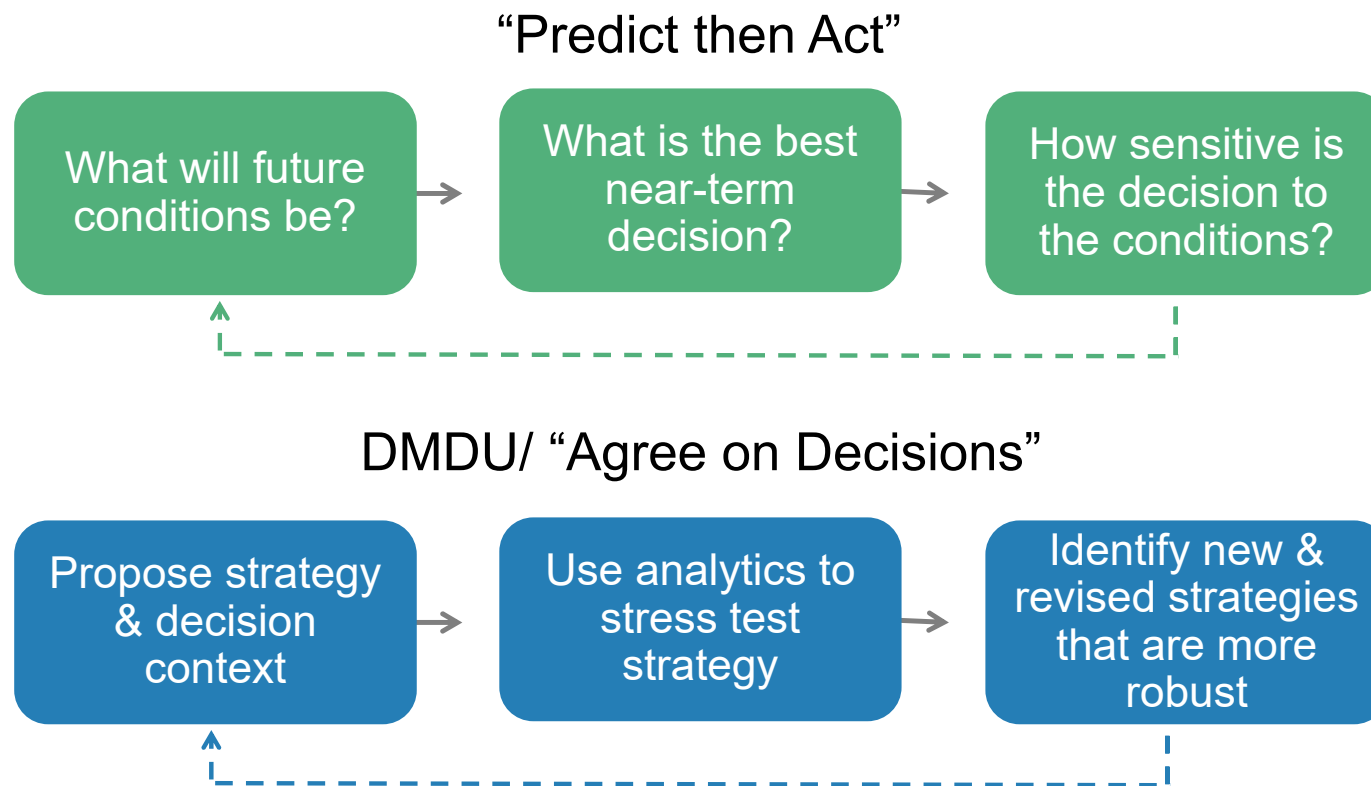

Competing analyses can  
contribute to gridlock

Predict-then-act distracts from the  
main task of working together to  
identify creative solutions

Deep uncertainty occurs when decisionmakers don't know  
or don't agree on the likelihood of alternative futures or  
how actions are related to consequences

# Decision Making Under Deep Uncertainty (DMDU) conducts the analysis in reverse order

***Thanks for playing  
Decisions for the Decades!***

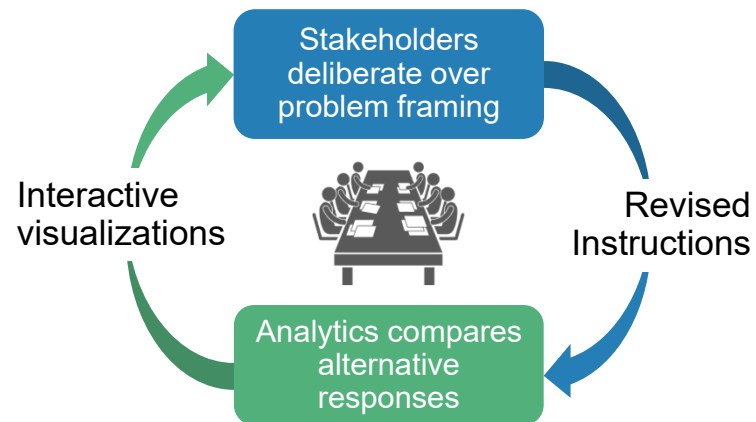

RAND  
CORPORATION

# The game motivates DMDU approaches for collaborative, evidence-based long-term decision making

Multi-scenario, multi-objective  
DMDU analytics provides  
“prosthesis of the imagination”

Deliberation with analysis engages  
groups with diverse interests,  
values, and world views

Help build  
consensus on  
bold plans

Helps implement *long-term policy analysis*, in which reflecting on potential events decades or more in the future causes policy makers to choose near-term actions different than those they would otherwise pursue

# RAND applies these methods in many areas
